

## Wi-Fi in Schools - A Hot Topic!

Volume 4 Edition 16

November 22, 2015

### Greetings!

Throughout the United States, school districts are installing Wi-Fi in schools and distributing wireless devices to the teachers and children to use during the school day. An abundance of science shows that wireless radiation can cause biological changes in humans, and it is much safer to use devices that are cabled to the Internet. Two outstanding and distinguished leaders, Ronald M. Powell, Ph.D, (Applied Physics, Harvard University, 1975) and Devra Davis, Ph.D, MPH, President of Environmental Health Trust developed important documents to educate school decision-makers about concerns with wireless radiation and the benefits of wired technology.

Dr. Powell created an outstanding document; Message to Public Schools about Wireless Devices. It advises school administrators that "if wireless devices, such as Wi-Fi, are used in your schools, then the health of your staff, your teachers, and your students can be at risk. But this problem can be successfully addressed, and with benefit to all." [Read the document here](#). It can be copied and sent to any school administrator. He also developed a similar [document](#) to be shared with public library directors.

Dr. Davis, along with other notable scientists, recently sent a letter to the Secretary of the US Department of Education stating "We applaud and support efforts to see that schools employ the most up-to-date educational technologies with high-speed Internet access. The use of wired systems to provide this access is to be preferred because of speed, access, and safety issues that we outline here. We are part of a growing number of scientists who are deeply concerned about the growing scientific evidence that wireless networks may pose serious health threats, particularly for children, pregnant women, and people with an underlying illness." [Read the letter here](#). It is an excellent resource addressing why it is critical to get the wireless radiation out of our schools.

The Center for Safer Wireless continues to advocate for wired schools with educational administrators. We appreciate and value the efforts of Dr. Powell and Dr. Davis as well as the other activists for promoting safer schools through wired technology. Please share the documents referenced with your school officials.

## The Center for Safer Wireless has a new website

### Check out our new Website

We have made it easier to get the information you need to live a healthier life in our wireless radiation-filled world. Be sure to check out our services section to learn about what we offer to help people make their environment healthier and the news section for the most current information and events.

---

Thank you for your support and commitment to the Center for Safer Wireless. Your financial support of our organization allows us to continue making progress in helping people live healthier lives with technology. We are constantly addressing concerns about wireless radiation with countless government officials, and they are listening. Because of you and your belief in us, we are working towards a healthier environment for us and our children.

Sincerely,

Desiree Jaworski  
Center for Safer Wireless
